

## **OHSAS 18001 H&S**

The standard for Occupational Health & Safety (OH&S), OHSAS 18001 provides a platform for formalising and standardising an organisation's approach to health & safety. The standardisation and communication of health and safety related processes to employees and external organisations can reduce the risk of workplace incidents, ensure compliance with relevant legislation and industry codes of practice and provide a basis for continual improvement of health and safety performance.

With a 100% success rate of approved accreditations, you can be assured of our extensive experience, knowledge and trusted approach. Combined with first class customer service, the OHSAS 18001 H&S solution includes:

- Custom designed and implemented Occupational Health and Safety (OH&S) management system based on OHSAS 18001 H&S
- Organisation assessment and analysis; defining and documenting procedures to improve the consistency of output
- Development of your organisational framework to ensure the Occupational Health & Safety Management System (OH&S) delivers continuous improvement; meeting the requirements of OHSAS 18001 H&S
- Defining and documenting procedures; providing a platform for the development of the OH&S management system, including training and documentation
- Extensive system audit and management review before the external certification body complete their assessment
