

Career Services

As the employment market becomes more fluid, it is tough for anyone to retain control of their career. The pace that organisations and technology are developing means that individuals who thought they had a “career for life” are now discovering that their chosen route comes to an end in less than 10 years.

Combining first class customer service with our extensive experience, knowledge and trusted approach, THE Group has developed a range of Career Services that support both the individual and allow organisations to enhance their “total reward packages”.

- Career coaching
- Interview skills
- Assessment skills
- Psychometric testing
- CV writing
- Building self confidence
